NEW QUESTION: 1 Customer Requirements: You have been tasked with creating a vSphere 6.5 data center design for an organization. The organization wants three defined virtual machine performance levels: - Gold Tier - High workload VMs - Silver Tier - Medium workload VMs - Bronze Tier - Development workload VMs The organization has eight ESXi hosts that can be used in the design. Five of the hosts are older "medium performance" hosts, while the last 3 are newer "high performance" hosts that provide better resources when compared to the other hosts. The organization has provided a list of requirements that the design must meet: - Gold Tier virtual machines should run only on high performance servers, unless no high performance servers are available. They should also be allocated 75% of overall available resources regardless of placement. - Silver Tier virtual machines should run only on medium performance servers, unless no medium performance servers are available. They should also be allocated 25% of overall available resources regardless of placement. - Bronze Tier virtual machines should run only on medium performance servers. They should also receive a 35% subset of resources from those allocated to the Silver Tier. Design Requirements: Create a logical design that shows resource allocation and cluster policies needed to meet the customer's requirements. The design should include: - All required server(s) - All required resource(s) Place host(s) in the required DRS group(s). Place virtual machines in the appropriate resource pool(s).
