**NEW QUESTION: 2**Your network contains an Active Directory domain named contoso.com. The domain contains 10 sites.The sites are located in different cities and connect to each other by using low-latency WAN links.In each site, you plan to implement Microsoft System Center 2012 Configuration Manager and to deploy multiple servers.You need to recommend which Configuration Manager component must be deployed to each site for the planned deployment. What should you include in the recommendation?More than one answer choice may achieve the goal. Select the BEST answer.**A.** A software update point**B.** A secondary site server that has all of the Configuration Manager roles installed**C.** A distribution group point**D.** A management point**Answer:** **C**Explanation:Distribution point groups provide a logical grouping of distribution points and collections for content distribution.A Distribution point group is not limited to distribution points from a single site, and can contain one or more distribution points from any site in the hierarchy. When you distribute content to a distribution point group, all distribution points that are members of the distribution point group receive the content.Reference:
