NEW QUESTION: 1 Which type of control is concerned with restoring controls?
A. Detective controls
B. Compensating controls
C. Preventive controls
D. Corrective controls
Answer: D
Explanation: Corrective controls are concerned with remedying circumstances and restoring controls. Detective controls are concerned with investigating what happen after the fact such as logs and video surveillance tapes for example. Compensating controls are alternative controls, used to compensate weaknesses in other controls. Preventive controls are concerned with avoiding occurrences of risks. Answer: D

NEW QUESTION: 3 **A.** Option A **B.** Option B **C.** Option C **D.** Option D
Answer: C
Explanation: A tag is a label that you or AWS assigns to an AWS resource. Each tag consists of a key and a value. A key can have more than one value. You can use tags to organize your resources, and cost allocation tags to track your AWS costs on a detailed level. After you activate cost allocation tags, AWS uses the cost allocation tags to organize your resource costs on your cost allocation report, to make it easier for you to categorize and track your AWS costs. AWS provides two types of cost allocation tags, an AWS-generated tag and user-defined tags. AWS defines, creates, and applies the AWS-generated tag for you, and you define, create, and apply user-defined tags. You must activate both types of tags separately before they can appear in Cost Explorer or on a cost allocation report. For more information on Cost Allocation tags, please visit the below URL:
