NEW QUESTION: 1A software development manager is running a project using agile development methods. The company cybersecurity engineer has noticed a high number of vulnerabilities have been making it into production code on the project. Which of the following methods could be used in addition to an integrated development environment to reduce the severity of the issue?
A. Implement unit tests that incorporate static code analyzers
B. Conduct a penetration test on each function as it is developed
C. Develop a set of basic checks for common coding errors
D. Adopt a waterfall method of software development
Answer: A

NEW QUESTION: 2A. Option A B. Option B C. Option C D. Option D
Answer: D
Explanation: It is always possible that someone can terminate an EC2 instance using the Amazon EC2 console, command line interface or API by mistake. If the admin wants to prevent the instance from being accidentally terminated, he can enable termination protection for that instance. The user can also setup shutdown behavior for an EBS backed instance to guide the instance on what should be done when he initiates shutdown from the OS using Instance initiated shutdown behaviour. If the instance initiated behavior is set to terminate and the user shuts off the OS even though termination protection is enabled, it will still terminate the instance.
Reference: <http://docs.aws.amazon.com/AWSEC2/latest/UserGuide/terminating-instances.html>

NEW QUESTION: 3 Which of the following is correct about the Huawei storage OceanStor V3 storage system?
A. When IP Fallback mode is set to Manual, when the port fails to recover, the active port link is in normal status and lasts longer than 1 minute, the system can switch the service to the primary port
B. One Ethernet port can be used to create multiple logical ports
C. If binding port A and physical port B are added to the same VLAN, as long as one physical port in bonded port A fails, the service switches to Physical Port B
D. If you type Ethernet ports A and B into VLAN 2, by default the port A and B data are in the same drift group
Answer: C
