NEW QUESTION: 1 Which of the following is the proper way to quantify the total monetary damage resulting from an exploited vulnerability? **A.** Calculate the TCOB. **B.** Calculate the MTBFC. **C.** Calculate the ALED. **D.** Calculate the ARO **Answer: C**

NEW QUESTION: 2 You have implemented code that uses elastic transactions spanning across three different Azure SQL Database logical servers. Database administrators report that some transactions take longer to complete than expected. You need to use the correct tool to monitor all the transactions originating from the elastic transaction implementation. Which tool should you use? **A.** Run the sys.dm_tran_active_transactions dynamic management view. **B.** Run the sys.dm_tran_current_snapshot dynamic management view. **C.** Use the dependencies section of Azure Applications Insights. **D.** Run the sys.dm_tran_active_snapshot_database_transactions dynamic management view. **Answer: A** **Explanation:** Explanation Use Dynamic Management Views (DMVs) in SQL DB to monitor status and progress of your ongoing elastic database transactions. These DMVs are particularly useful: sys.dm_tran_active_transactions: Lists currently active transactions and their status. The UOW (Unit Of Work) column can identify the different child transactions that belong to the same distributed transaction. All transactions within the same distributed transaction carry the same UOW value. sys.dm_tran_database_transactions: Provides additional information about transactions, such as placement of the transaction in the log. sys.dm_tran_locks: Provides information about the locks that are currently held by ongoing transactions **References:** <https://docs.microsoft.com/en-us/azure/sql-database/sql-database-elastic-transactions-overview>

NEW QUESTION: 3 A high-profile, high-priority project within your organization is being created. Management wants you to pay special attention to the project risks and do all that you can to ensure that all of the risks are identified early in the project. Management has to ensure that this project succeeds. Management's risk aversion in this project is associated with what term? **A.** Risk conscience **B.** Risk mitigation **C.** Quantitative risk analysis **D.** Utility function **Answer: D**

NEW QUESTION: 4 Two brothers took the GMAT exam, the higher score is X and the lower one is Y. If the difference between the two scores is equal to their average, what is the value of Y/X? **A.** 1/3 **B.** 3 **C.** There isn't enough data to answer the question. **D.** 2 **E.** 1/2 **Answer: A** **Explanation:** Explanation/Reference: Explanation: If the difference is equal to the average, then we could write the equation: $X - Y = (X + Y)/2$. $X - 3Y = 0$ $Y/X = 1/3$.
