The pass rate is 98.65% for 2V0-32.24 learning materials, and we have gained popularity in the international market due to the high pass rate.

NEW QUESTION: 1 Refer to the exhibit. R3 is failing to join the multicast group 224.1.1.1 that is sourcing from R1. Which two actions can you take to allow multicast traffic to flow correctly? (Choose two.)
A. Add an additional static unicast route on R2 toward the loopback interface of R3.
B. Remove the static unicast route on R1.
C. Replace the static multicast route on R1 to send traffic toward R2.
D. Remove the static multicast route on R1.
E. Configure OSPF on R1 and R3 to include the tunnel interfaces.
F. Add an additional static multicast route on R2 for multicast group 224.1.1.1 toward R3.
Answer: D, E
Explanation: Since the tunnel interfaces are not part of OSPF, the best path to the multicast source of R1 from R3 would be over the Gi0/0 path via OSPF. However, the static mroute is configured to use the tunnel, so this causes an RPF failure used in Sparse Mode. Best fix is to add the tunnel interfaces into OSPF and remove the static mroute so that that the RPF check no longer fails.

NEW QUESTION: 2 In an acute care hospital, a complete history and physical may not be dictated for a new admission when
A. the patient's stay is less than 24 hours.
B. a legible copy of a recent H&P performed in the attending physician's office is available.
C. the patient has an uneventful course in the hospital.
D. the patient is readmitted for a similar problem within 1 year.
Answer: B

NEW QUESTION: 3 Which of the following is the MOST effective way to ensure the process for granting access to new employees is standardized and meets organizational security requirements?
A. Grant authorization to individual systems as required with the approval of information security management.
B. Embed the authorization and creation of accounts with HR onboarding procedures.
C. Adopt a standard template of access levels for all employees to be enacted upon hiring.
D. Require managers of new hires be responsible for account setup and access during employee orientation.
Answer: B

NEW QUESTION: 4 A company has hired a solutions architect to design a reliable architecture for its application. The application consists of one Amazon RDS DB instance and two manually provisioned Amazon EC2 instances that run web servers. The EC2 instances are located in a single Availability Zone. An employee recently deleted the DB instance and the application was unavailable for 24 hours as a result. The company is concerned with the overall reliability of its environment. What should the solutions architect do to maximize reliability of the application's infrastructure?
A. Delete one EC2 instance and enable termination protection on the other EC2 instance. Update the DB instance to be Multi-AZ and enable deletion protection
B. Place the EC2 instances in an EC2 Auto Scaling group that has multiple subnets located in multiple Availability Zones. Use Spot Instances instead of On-Demand instances. Set up Amazon CloudWatch alarms to monitor the health of the instances. Update the DB instance to be Multi-AZ and enable deletion protection
C. Create an additional DB instance along with an Amazon API Gateway and an AWS Lambda function. Configure the application to invoke the Lambda function through API Gateway. Have the Lambda function write the data to the two DB instances
D. Update the DB instance to be Multi-AZ and enable deletion protection. Place the EC2 instances behind an Application Load Balancer and run them in an EC2 Auto Scaling group across multiple Availability Zones
Answer: D
