And this version also helps establish the confidence of the candidates when they attend the SAFe-Agilist exam after practicing, Our dumps will prepare you for an excellence result.

i got recommendation about your products from a colleague.

NEW QUESTION: 1 **Answer:** Explanation:Explanation

NEW QUESTION: 2 Your database is running in ARCHIVELOG mode. You have been taking backups of all the data files and control files regularly. You are informed that some important tables in the BILLING tablespace have been dropped on February 28, 2007 at 10.30 AM and must be recovered. You decide to perform an incomplete recovery using the following command: SQL> RECOVER DATABASE UNTIL TIME '2007-02-28:10:15:00'; Identify the files that must be restored to recover the missing tables successfully. **A.** Restore the backup of all the data files and the control file. **B.** Restore the backup of all the data files belonging to the tablespace containing the dropped tables. **C.** Restore the backup of all the data files. **D.** Restore the backup of only the data files that contain the dropped tables. **Answer: C** **Explanation:** The tricky of answer is the command "RECOVER DATABASE", so that you must use "RESTORE DATABASE" to restore all the data files. If the recover command is "RECOVER DATAFILE", then the Answer D will be correct.

NEW QUESTION: 3 **A.** Option **D**. **B.** Option **A**. **C.** Option **B**. **D.** Option **C** **Answer: D** **Explanation:** Understanding the Key Recovery Agent Role KRAs are Information Technology (IT) administrators who can decrypt users' archived private keys. An organization can assign KRAs by issuing KRA certificates to designated administrators and configure them on the CA. The KRA role is not one of the default roles defined by the Common Criteria specifications but a virtual role that can provide separation between Certificate Managers and the KRAs. This allows the separation between the Certificate Manager, who can retrieve the encrypted key from the CA database but not decrypt it, and the KRA, who can decrypt private keys but not retrieve them from the CA database. Reference: Understanding User Key Recovery

NEW QUESTION: 4 Is there a need for Risk Analysis in Care? **A.** Only when needed as there is no official process. **B.** Always, at every stage of Care planning and execution. **C.** No, Risk Analysis is a mandatory process in NI Project Management only. **D.** Only when establishing Care for the newly negotiated contract. **Answer: B**
