NEW QUESTION: 1 DRAG DROP You have an Azure subscription that contains a storage account. You have an on-premises server named Server1 that runs Windows Server 2016. Server1 has 2 TB of data. You need to transfer the data to the storage account by using the Azure Import/Export service. In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order. NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select. Select and Place: **Answer:** Explanation: Explanation/Reference: Explanation: At a high level, an import job involves the following steps: 1. Determine data to be imported, number of drives you need, destination blob location for your data in Azure storage. 2. Use the WAImportExport tool to copy data to disk drives. Encrypt the disk drives with BitLocker. 3. Create an import job in your target storage account in Azure portal. Upload the drive journal files. 4. Provide the return address and carrier account number for shipping the drives back to you. 5. Ship the disk drives to the shipping address provided during job creation. 6. Update the delivery tracking number in the import job details and submit the import job. 7. The drives are received and processed at the Azure data center. 8. The drives are shipped using your carrier account to the return address provided in the import job. References: <https://docs.microsoft.com/en-us/azure/storage/common/storage-import-export-service>
