NEW QUESTION: 2Your network contains an Active Directory domain named adatum.com. The domain contains two sites named Site1 and Site2 and two domain controllers named DC1 and DC2. DC1 is located in Site1 and DC2 is located in Site2.You install an additional domain controller named DC3 in Site1 and you ship DC3 to Site2.A technician connects DC3 to Site2.You discover that users in Site2 are authenticated only by DC2.You need to ensure that the users in Site2 are authenticated by both DC2 and DC3.What should you do?**A.** In Active Directory Users and Computers, configure the msDS-PrimaryComputer attribute for DC3.**B.** In Active Directory Users and Computers, configure the msDS-Site-Affinity attribute for DC3.**C.** From Active Directory Sites and Services, modify the site link between Site1 and Site2.**D.** From Active Directory Sites and Services, move DC3.**Answer: D**

NEW QUESTION: 3A small company's Chief Executive Officer (CEO) has asked its Chief Security Officer (CSO) to improve the company's security posture quickly with regard to targeted attacks. Which of the following should the CSO conduct FIRST?**A.** Purchase multiple threat feeds to ensure diversity and implement blocks for malicious traffic.**B.** Survey threat feeds from services inside the same industry.**C.** Conduct an internal audit against industry best practices to perform a qualitative analysis.**D.** Deploy a UTM solution that receives frequent updates from a trusted industry vendor.**Answer: B**Explanation:Security posture refers to the overall security

plan from planning through to implementation and comprises technical and non-technical policies, procedures and controls to protect from both internal and external threats. From a security standpoint, one of the first questions that must be answered in improving the overall security posture of an organization is to identify where data resides. All the advances that were made by technology make this very difficult. The best way then to improve your company's security posture is to first survey threat feeds from services inside the same industry. Incorrect Answers: B: Purchasing multiple threat feeds will provide better security posture, but the first step is still to survey threats from services within the same industry. C: Conducting an internal audit is not the first step in improving security posture of your company. D: Deploying a UTM solution to get frequent updates is not the first step to take when tasked with the job of improving security posture.
