Event suppression
Specified events notifications can be suppressed on the basis of source/destination IP address or per Rule.
Note: When you add event suppression for a rule. The signature inspection works as normally but the system does not generate the events if traffic matches the signature. If you specify a specific Source/Destination then events do not appear

Steps to configure Event Threshold: Step 1. Select the Rule(s) for which you want to configure Event Threshold. Step 2. Click Event Filtering. Step 3. Click Suppression. Step 4. Select Suppression Type from the drop down list. (Rule or Source or Destination). Step 5. Click OK to complete.
