The reasons why we have such service lies in that people are always busy and want to enjoy high-quality life of 500-430 exam cram, Truthfully there is big enemy in sabotaging your [500-430](#) plan of passing the certificate, which is the useless practice material in the market.

Some details will be perfected and the system will be updated.

NEW QUESTION: 1A. Option AB. Option DC. Option BD. Option C
Answer: A
Explanation: If all of the routers are connected to each other using a layer 2 switch, then each router will only have the single switch port that it connects to as its neighbor. Even though multiple routing neighbors can be formed over a layer 2 network, only the physical port that it connects to will be seen as a CDP neighbor. CDP can be used to determine the physical topology, but not necessarily the logical topology.

NEW QUESTION: 2 One of the goals of your newly formed SOA Initiative is to address current integration brittleness and inflexibility. Which option best supports your goal?
A. Utilize REST Services because they are more flexible because they are not restrained by WS* standards.
B. Decouple Service consumers from Service providers by encapsulating and abstracting the source systems behind a Service interface
C. Make sure the Service contract details how the Service was implemented so that the Service consumer can take advantage of the underlying technology platform.
D. Utilize XML because it is flexible and Service consumers can transform the Service payload easily.
Answer: B
Explanation: Explanation/Reference: Explanation: Service-oriented integration done correctly avoids the brittleness of a point-to-point integration architecture. In service-oriented integration the consumer is decoupled from the source system via the SOA Service that encapsulates and abstracts the source systems behind a service interface. Consumers of the SOA Service should need no details about the underlying source system. They should base the service usage solely on the contract provided by the SOA Service.
