Enjoy a Unique Learning Experience Of Estruturit Testing Engine.

NEW QUESTION: 1Which are the Component Properties of the SAP Afaria Configuration Areas? Choose the correct answers
A. Self-Service Portal Screen
B. SMTP Screen
C. iOS Notification Screen
D. SMS Gateway Screen
Answer: A,C

NEW QUESTION: 2Your network includes a SecurePlatform machine running NG with Application Intelligence (AI) R55. This configuration acts as both the primary Security Management Server and VPN-1 Pro Gateway. You add one machine, so you can implement Security Gateway R75 in a distributed environment. The new machine is an Intel CoreDuo processor, with 2 GB RAM and a 500-GB hard drive. How do you use these two machines to successfully migrate the NG with AI R55 configuration?
A. 1. Export the configuration on the existing machine to a network share
2. Uninstall the Security Gateway from the existing machine, using sysconfig
3. Insert the R75 CD ROM. and run the patch add CD-HGM command to upgrade the Security Management Server to Security Gateway R 704. Select upgrade with imported file, and reboot
5. Install a new R75 Security Gateway as the only module on the new machine, and reset SIC to the new Gateway
B. 1. On the existing machine, export the NG with AJ R55 configuration to a network share.
2. Insert the R75 CD-ROM in the old machine Install the R7D Security Gateway only while reinstalling the SecurePlatform OS over the top of the existing installation. Complete sysconfig.
3. On the new machine, install SecurePlatform as the primary Security Management Server only.
4. Transfer the exported. tgz file into the new machine, import the configuration, and then reboot
5. Open SmartDashboard, change the Gateway object to the new version, and reset SIC for the Gateway object.
C. 1. Export the configuration on the existing machine to a tape drive
2. Uninstall the Security Management Server from the existing machine, using sysconfig.
3. Insert the R75 CD-ROM. run the patch add CD-ROM command to upgrade the existing machine to the R75 Security Gateway, and reboot
4. Install a new primary

Security Management Server on the new machine5.Change the Gateway object to the new version, and reset SICD. 1. Export the configuration on the existing machine as a backup only 2.Edit \$FWDIRproduct.conf on the existing machine, to disable the VPN-1 Pro Gateway package 3.Reboot the existing machine4.Perform an in place upgrade on the Security Management Server using the command "patch odd cd"5.On the new machine, install SecurePlatform as the R75 Security Gateway only6.Run sysconfig to complete the configuration7.From SmartDashboard, reconfigure the Gateway object to the new version, and reset SICAnswer: B

NEW QUESTION: 3 Universal Containers (UC) is planning to launch its Customer Community. The community will allow user to register shipment requests which are then processed by UC employees. Shipment requests contain header information, and then a list of no more than 5 items being shipped. UC will initially roll out its community to 5,000 customers in Europe, and will ultimately roll out to 20,000 customers worldwide within the next two years. UC expects an average of 10 shipment requests per week per customer. UC wants customers to be able to view up to three years of shipment requests and use Salesforce reports. What is the recommended solution for UC's Data Architect to address the requirements?**A.** Create a custom object to track shipment requests with five lookup custom fields for each item being shipped Implement an archiving process that moves data off-platform after three years.**B.** Create a custom object to track shipment requests and a child custom object to track shipment items. Implement an archiving process that moves data off-platform after three years.**C.** Create an external custom object to track shipment requests and a child external object to track shipment items. External objects are stored off-platform in Heroku's Postgres database.**D.** Create an external custom object to track shipment requests with five lookup custom fields for each item being shipped. External objects are stored off-platform in Heroku's Postgres database.**Answer: B**
