NEW QUESTION: 1Success is measured by benefits realization for a:
A. portfolio
B. program
C. strategic plan
D. project
Answer: A
Explanation:Explanation/Reference:Explanation:1.4.2 Portfolio Management
A portfolio refers to projects, programs, subportfolios, and operations managed as a group to achieve strategic objectives. The projects or programs of the portfolio may not necessarily be interdependent or directly related. For example, an infrastructure firm that has the strategic objective of "maximizing the return on its investments" may put together a portfolio that includes a mix of projects in oil and gas, power, water, roads, rail, and airports. From this mix, the firm may choose to manage related projects as one program. All of the power projects may be grouped together as a power program. Similarly, all of the water projects may be grouped together as a water program. Thus, the power program and the water program become integral components of the enterprise portfolio of the infrastructure firm.

NEW QUESTION: 2Which is an example of a business related measurement?
A. The number of passengers checked in
B. The number of problems resolved
C. The average resolution time for incidents
D. The average time to response to change requests
Answer: A
