NEW QUESTION: 1

ユニバーサルコンテナは、エージェントがサービスレベル契約の範囲内で確実に機能するように、さまざまなレベルのサポートを顧客に提供することを計画しています。コンサルタントはどの機能を検討する必要がありますか？**A. オムニチャネルB. ケースマイルストーンC. 資格D. ケースのエスカレーション****Answer: A,C,D**

NEW QUESTION: 2In this item, you will need to use all information presented to you to successfully answer the question.Refer to the exhibits. An administrator needs to perform a factory reset on a C-Series endpoint. What are two valid ways to accomplish this task? (Choose two.)**A. Exhibit CB. Exhibit DC. Exhibit AD. Exhibit EE. Exhibit B****Answer: A,B****Explanation:** Explanation/Reference:Explanation:System recovery: Factory reset If there is a severe problem with the video system, the last resort may be to reset it to its default factory settings. Always consider reverting to the previously used software image before performing a factory reset. In many situations this will recover the system*.A factory reset should only be performed by a system administrator or in contact with Cisco technical support. When factory resetting the video system the following happens:* The call logs will be deleted.* Passwords will be reset to default.* All system parameters will be reset to default values.* All files that have been uploaded to the system will be deleted. This includes, but is not limited to, custom backgrounds, certificates, and the favorites list (My contacts).* The previous (inactive) software image will be deleted.* Release keys and option keys will not be affected. The system restarts automatically after the reset. It is using the same software image as before. We strongly recommend that you backup your system's log files and configuration before you perform a factory reset.Reference:
<http://www.cisco.com/c/dam/en/us/td/docs/telepresence/endpoint/profile-series/tc7/administration-guide/profile-c60-c40-and-codec-c60-c40-administrator-guide-tc70.pdf>

NEW QUESTION: 3You administer a single server that contains a Microsoft SQL Server 2016 default instance on which several production databases have been deployed.You plan to install a new ticketing application that requires the deployment of a database on the server.The SQL login for this application requires sysadmin permissions. You need to ensure that the login for the ticketing application cannot access other production databases.What should you do?**A. Install a new named SQL Server instance on the server.B. Use the SQL Server default instance and enable Contained Databases.C. Install a new default SQL Server instance on the server.D. Use the SQL Server default instance and configure a user-defined server role. Add the login for the ticketing application to this role.****Answer: A****Explanation:**ExplanationSQL Server supports multiple instances of SQL Server on a single server or processor, but only one instance can be

the default instance. All others must be named instances. A computer can run multiple instances of SQL Server concurrently, and each instance runs independently of other instances.
