2.0Answer: CExplanation:Explanation/Reference:Explanation:

[https://technet.microsoft.com/en-us/library/hh546834\(v=sc.12\).aspx](https://technet.microsoft.com/en-us/library/hh546834(v=sc.12).aspx)

NEW QUESTION: 2The UPS5000-E power module adopts fan fault-tolerant design.When two fans are faulty, how many loads in percentage is this power module still be able to carry?**A.** 0.6

B. 0.3**C.** 0.2**D.** 0.5**Answer: B**

NEW QUESTION: 3質問をドラッグアンドドロップCisco

IOSデバイスのSNMP属性をから右側の正しいSNMPv2cまたはSNMPv3カテゴリにドラッグアンドドロップします。**Answer:** Explanation:

NEW QUESTION: 4What attack involves the perpetrator sending spoofed packet(s) with the SYN flag set to the victim's machine on any open port that is listening?**A.** Smurf attack**B.** Land attack**C.** Teardrop attack**D.** Bonk attack**Answer: B**Explanation:The Land attack involves the perpetrator sending spoofed packet(s) with theSYN flag set to the victim's machine on any open port that is listening. If the packet(s) contain the same destination and source IP address as the host, the victim's machine could hang or reboot.In addition, most systems experience a total freeze up, where as CTRL-ALT-DELETE fails to work, the mouse and keyboard become non operational and the only method of correction is to reboot via a reset button on the system or by turning the machine off.Vulnerable Systems:This will affect almost all Windows 95, Windows NT, Windows for Workgroups systems that are not properly patched and allow Net Bios over TCP/IP.In addition, machines running services such as HTTP, FTP, Identd, etc that do not filter packet(s), that contain the same source / destination IP address, can still be vulnerable to attack through those ports.Prevention:This attack can be prevented for open / listening ports by filtering inbound packets containing the same source / destination IP address at the router or firewall level.For most home users not running a lot of services, and for those who use IRC, disabling the Identd server within their client will stop most attacks since the identd service (113) is becoming the most attacked service/port.
