**NEW QUESTION: 3**A system administrator is responding to a legal order to turn over all logs from all company servers. The system administrator records the system time of all servers to ensure that:**A.** time offset can be calculated.**B.** the NTP server works properly.**C.** chain of custody is preserved.**D.** HDD hashes are accurate.**Answer: A**Explanation:It is quite common for workstation times to be off slightly from actual time, and that can happen with servers as well. Since a forensic investigation is usually dependent on a step-by-step account of what has happened, being able to follow events in the correct time sequence is critical. Because of this, it is imperative to record the time offset on each affected machine during the investigation. One method of assisting with this is to add an entry to a log file and note the time that this was done and the time associated with it on the system.
