**NEW QUESTION: 1** Documentation of record destruction should include all but which one of the following?  
**A.** signature of the individual supervising and witnessing the destruction  
**B.** statement that records were destroyed in the normal course of business  
**C.** dates not covered in destruction  
**D.** method of destruction  
**Answer: C**

**NEW QUESTION: 2** You are designing a solution to store flat files. You need to recommend a storage solution that meets the following requirements:  
\* Supports automatically moving files that have a modified date that is older than one year to an archive in the data store  
\* Minimizes costs  
A higher latency is acceptable for the archived files.  
Which storage location and archiving method should you recommend? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.  
**Answer:** Explanation: Explanation  
Storage location: Azure Blob Storage  
Archiving method: A lifecycle management policy  
Azure Blob storage lifecycle management offers a rich, rule-based policy for GPv2 and Blob storage accounts. Use the policy to transition your data to the appropriate access tiers or expire at the end of the data's lifecycle. The lifecycle management policy lets you:  
\* Transition blobs to a cooler storage tier (hot to cool, hot to archive, or cool to archive) to optimize for performance and cost  
\* Delete blobs at the end of their lifecycles  
\* Define rules to be run once per day at the storage account level  
\* Apply rules to containers or a subset of blobs  
Reference:  
<https://docs.microsoft.com/en-us/azure/storage/blobs/storage-lifecycle-management-concepts>

**NEW QUESTION: 3** A developer is creating an enhancement to an application that will allow people to be related to their employer. Which data model provides the simplest solution to meet the requirements?  
**A.** Create a lookup relationship to indicate that a person has an employer  
**B.** Create a master-detail relationship to indicate that a person has an employer  
**C.** Create a junction object to relate many people to many through master-detail relationship  
**D.** Create a junction object to relate many people to many through lookup relationship  
**Answer: B**
