**NEW QUESTION: 1**QRS State Bank is being examined under the lending test. Which of the following is the most relevant criteria for the lending test?**A.** The services QRS offers to its community**B.** The racial and gender characteristics of QRS's lending staff**C.** The location of QRS's branches**D.** The distribution of the bank's small business loans**Answer: D**

**NEW QUESTION: 2**The Node device LC0 is receiving packets destined to the host on the Node device LC1. The source IP address of the packets is 20.0.0.1 and the destination IP address is 77.0.0.1.How do you verify that the route to destination 77.0.0.1 exists in the RPDf table on LC0?**A.** Use the show route 77.0.0.1 command on Node device LC0.**B.** Use the show route fabric table default.bridgevpn.0 77.0.0/24 extensive command on Node device LC0.**C.** Use the show route fabric table default.inet.0 77.0.0/24 extensive command on Node device LC0.**D.** Use the show route table inet.0 command on Node device LC0.**Answer: C**

**NEW QUESTION: 3**How many non-overlapping channels are available on the 2.4 GHz regulatory wireless band?**A. 0B. 1C. 2D. 3Answer: B**

**NEW QUESTION: 4**Which best describes the svc:/system/boot-config service?**A.** It provides the parameters used to set the system to automatically perform a fast or slow reboot.**B.** It is used to change the milestone on a system.**C.** It is used to set the default run level of the system.**D.** When the service is enabled, the system performs a fast reboot by default; when it is disable the system performs a slow reboot by default.**Answer: A****Explanation:**Explanation/Reference: Explanation:Starting with the Oracle Solaris 11 Express release, Fast Reboot is supported on the SPARC platform, as well as the x86 platform. On both platforms, this feature is controlled by the SMF and implemented through a boot configuration service, svc:/system/boot-config. The boot-config service provides a means for setting or changing the default boot configuration parameters.The fastreboot\_default property of the boot-config service enables an automatic fast reboot of the system when either the reboot or the init 6 command is used. When the config/fastreboot\_default property is set to true the system automatically performs a fast reboot, without the need to use the reboot -f command. By default, this property's value is set to false on the SPARC platform and to true on the x86 platform.
