How to distinguish professional & valid [Valid Exam PEGACPLSA23V1 Registration](#) products from other practicing questions which can't guarantee pass?

NEW QUESTION: 1 Which of the following risk responses include feedback and guidance from well-qualified risk officials and those internal to the project? **A.** Expert judgment **B.** Contingent response strategy **C.** Risk Acceptance **D.** Explanation: Expert judgment is utilized in developing risk responses, including feedback and guidance from risk management experts and those internal to the project qualified to provide assistance in this process. Expert judgment is a technique based on a set of criteria that has been acquired in a specific knowledge area or product area. It is obtained when the project manager or project team requires specialized knowledge that they do not possess. Expert judgment involves people most familiar with the work of creating estimates. Preferably, the project team member who will be doing the task should complete the estimates. Expert judgment is applied when performing administrative closure activities, and experts should ensure the project or phase closure is performed to the appropriate standards. **E.** Risk transfer **Answer: A** Explanation: is incorrect. Risk acceptance means that no action is taken relative to a particular risk; loss is accepted if it occurs. If an enterprise adopts a risk acceptance, it should carefully consider who can accept the risk. Risk should be accepted only by senior management in relationship with senior management and the board. There are two alternatives to the acceptance strategy, passive and active. Passive acceptance means that enterprise has made no plan to avoid or mitigate the risk but willing to accept the consequences of the risk. Active acceptance is the second strategy and might include developing contingency plans and reserves to deal with risks. Answer: D is incorrect. Risk transfer means that impact of risk is reduced by transferring or otherwise sharing a portion of the risk with an external organization or another internal entity. Transfer of risk can occur in many forms but is most effective when dealing with financial risks. Insurance is one form of risk transfer. Answer: A is incorrect. Contingent response strategy, also known as contingency planning, involves adopting alternatives to deal with the risks in case of their occurrence. Unlike the mitigation planning in which mitigation looks to reduce the probability of the risk and its impact, contingency planning doesn't necessarily attempt to reduce the probability of a risk event or its impacts. Contingency comes into action when the risk event actually occurs.

NEW QUESTION: 2 A customer is using VMware ESXi, Microsoft Hyper-V 2012 R2, and Linux KVM. They will be deploying AltaVault appliances on the hypervisors. Which AltaVault appliance version should be used in this scenario? **A.** AVA800 **B.** AVA-c4 **C.** AVA400 **D.** AVA-v2 **Answer: A**

NEW QUESTION: 3 DRAG DROP You are developing a Windows Store app that allows users to capture videos and upload them to a social networking website. You need to ensure that the app saves the captured video in MP4 format to the user's videos library. How should you complete the code segment? (To answer, drag the appropriate option to the correct location or locations in the answer area. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.) **Answer:** Explanation:
