At that time you can decide whether to buy it or not.

NEW QUESTION: 1 DRAG DROP **Answer:** Explanation: Explanation: * onreadystatechange When a request to a server is sent, we want to perform some actions based on the response. The onreadystatechange event is triggered every time the readyState changes. The readyState property holds the status of the XMLHttpRequest. Example
xmlhttp.onreadystatechange=function(){if (xmlhttp.readyState==4 && xmlhttp.status==200){ document.getElementById("myDiv").innerHTML+xmlhttp.responseText;}}* Send a Request To a Server To send a request to a server, we use the open() and send() methods of the XMLHttpRequest object: xmlhttp.open("GET", "xmlhttp_info.txt", true); xmlhttp.send();

NEW QUESTION: 2 Which three conditions must be true for unused block compression to be used automatically while performing backups by using RMAN? **A.** The tablespaces are locally managed. **B.** There are no guaranteed restore points defined for the database. **C.** The default device for the backup must be set to disk. **D.** The compatible initialization parameter is set to 10.2 or higher. **E.** The fast recovery area is less than 50 percent free. **Answer: A, B, D** Explanation: Explanation/Reference: Explanation: About Unused Block Compression When employing unused block compression, RMAN skips reading, and backing up, any database blocks that are not currently allocated to some database object. This is regardless of whether those blocks had previously been allocated. So if a database table is dropped, RMAN will not back up the space that was occupied by that table until new objects are created in that space. Unused block compression is used automatically when the following conditions are true: - The COMPATIBLE

initialization parameter is set to 10.2 or higher. -There are currently no guaranteed restore points defined for the database. -The data file is locally managed. -The data file is being backed up to a backup set as part of a full backup or a level 0 incremental backup. -The backup set is created on disk, or Oracle Secure Backup is the media manager.
