NEW QUESTION: 1He was a un-common small man, he really was. Certainly not so small as he was made out to be, but where is your Dwarf as is? He was a most uncommon small man, with a most uncommon large Ed; and what he had inside that Ed, nobody ever knowed but himself: even supposin himself to have ever took stock of it, which it would have been a stiff job for even him to do. The kindest little man as never growed! Spirited, but not proud. When he travelled with the Spotted Baby though he knowed himself to be a nat'ral Dwarf, and knowed the Baby's spots to be put upon him artificial, he nursed that Baby like a mother. You never heard him give a ill-name to a Giant. He DID allow himself to break out into strong language respect in the Fat Lady from Norfolk; but that was an affair of the 'art; and when a man's 'art has been trifled with by a lady, and the preference give to a Indian, he ain't master of his actions. He was always in love, of course; every human nat'ral phenomenon is. And he was always in love with a large woman; I never knowed the Dwarf as could be got to love a small one. Which helps to keep 'em the Curiosities they are. One sing'ler idea he had in that Ed of his, which must have meant something, or it wouldn't have been there. It was always his opinion that he was entitled to property. He never would put his name to anything. He had been taught to write, by the young man without arms, who got his living with his toes (quite a writing master HE was, and taught scores in the line), but Chops would have starved to death, afore he'd have gained a bit of bread by putting his hand to a paper. This is the more curious to bear in mind, because HE had no property, nor hope of property, except his house and a sarser. When I say his house, I mean the box, painted and got up outside like a reg'lar six-roomer, that he used to creep into, with a diamond ring (or quite as good to look at) on his forefinger, and ring a little bell out of what the Public believed to be the Drawing-room winder. And when I say a sarser, I mean a Chaney sarser in which he made a collection for himself at the end of every Entertainment. His cue for that, he took from me: "Ladies and gentlemen, the little man will now walk three times round the Cairawan, and retire behind the curtain." When he said anything important, in private life, he mostly wound it up with this form of words, and they was generally the last thing he said to me at night afore he went to bed. He had what I consider a fine mind - a poetic mind. His ideas respectin his property never come upon him so strong as when he sat upon a barrel-organ and had the handle turned. After the wibration had run through him a little time, he would screech out, "Toby, I feel my property coming - grind away! I'm counting my guineas by thousands, Toby - grind away! Toby, I shall be a man of fortun! I feel the Mint ajingling in me, Toby, and I'm swelling out into the Bank of England!" Such is the influence of music on a poetic mind. Not that he was partial to any other music but a barrel-organ; on the contrary, hated it. He had a kind of a everlasting grudge agin the Public: which is a thing you may notice in many phenomena that get their living out of it. What riled him most in the nater of his occupation was, that it kep him out of Society. He was continiawly saying, "Toby, my ambition is, to go into Society. The curse of my position towards the Public is, that it keeps me hout of Society. This don't signify to a low beast of a Indian; he an't formed for Society. This don't signify to a Spotted Baby; HE an't

formed for Society. I am."The phrase "He had been taught to write, by the young man without arms" 4th paragraph" is an example of **A. exposition. B. irony. C. rhetoric. D. allusion. E. euphemism.** **Answer: B** Explanation: Explanation/Reference: Explanation: Clearly the fact that the Dwarf was taught to write by someone without arms qualifies as irony. None of the other devices approach legitimacy.

NEW QUESTION: 3 You are solving a classification task. You must evaluate your model on a limited data sample by using k-fold cross-validation. You start by configuring a k parameter as the number of splits. You need to configure the k parameter for the cross-validation. Which value should you use? **A. k=0.9 B. k=10 C. k=1 D. k=0.5** **Answer: B** Explanation: Explanation Leave One Out (LOO) cross-validation Setting $K = n$ (the number of observations) yields n-fold and is called leave-one out cross-validation (LOO), a special case of the K-fold approach. LOO CV is sometimes useful but typically doesn't shake up the data enough. The estimates from each fold are highly correlated and hence their average can have high variance. This is why the usual choice is $K=5$ or 10 . It provides a good compromise for the bias-variance tradeoff.
