timeoutコマンドは、TACACS非アクティブの20秒後に次のサーバに移動するデバイスが発生します。**D.** ルータは、デフォルトのポート上のNAS、TCP1645と通信します。**Answer: B**

**Explanation:** Explanation tacacs-server host host-name [port integer] [timeout integer] [key string] [single-connection] [nat] The single-connection keyword specifies a single connection (only valid with Cisco Secure Release 1.0.1 or later). Rather than have the router open and close a TCP connection to the server each time it must communicate, the single-connection option maintains a single open connection between the router and the server. The single connection is more efficient because it allows the server to handle a higher number of TACACS operations.
