NEW QUESTION: 1

VxRailノードのどのコンポーネントにIPアドレスを割り当てる必要がありますか？**A.**

vSAN、vCenter、vRealize tog Insight、およびvMotion**B.**

ESXiホスト、vCenter、ESRS。およびiDRAC**C.** ESXiホスト、vSAN、vCenter、ESRSD.

ESXiホスト、vSAN、vMotion、およびiDRAC**Answer: D**

NEW QUESTION: 2You wanted to destroy some of the dependent resources from real infrastructure. You choose to delete those resources from your configuration file and run terraform plan and then apply. Which of the following way your resources would be destroyed?
A. Terraform can still determine the correct order for destruction from the state even when you delete one or more items from the configuration.**B.** Those would be destroyed in the order in which they were written in the configuration file previously before you have deleted them from configuration file.**C.** You can not destroy resources by deleting them from configuration file and running plan and apply.**D.** The resource will be destructed in random order as you have already deleted them from configuration.**Answer: A**
Explanation:ExplanationTerraform typically uses the configuration to determine dependency order. However, when you delete a resource from a Terraform configuration, Terraform must know how to delete that resource. Terraform can see that a mapping exists for a resource not in your configuration and plan to destroy. However, since the configuration no longer exists, the order cannot be determined from the configuration alone.To ensure correct operation, Terraform retains a copy of the most recent set of dependencies within the state.Now Terraform can still determine the correct order for destruction from the state when you delete one or more items from the configuration.

NEW QUESTION: 3The use of residual biometric information to gain unauthorized access is an example of which of the following attacks?**A.** Brute force**B.** Mimic**C.** Replay**D.** Cryptographic
Answer: C
Explanation:Explanation/Reference:Explanation:Residual biometric characteristics, such as fingerprints left on a biometric capture device, may be reused by an attacker to gain unauthorized access. A brute force attack involves feeding the biometric capture device numerous different biometric samples. A cryptographic attack targets the algorithm or the encrypted data, in a mimic attack, the attacker reproduces characteristics similar to those of the enrolled user, such as forging a signature or imitating a voice.
