NEW QUESTION: 1 A 68-year-old client developed acute respiratory distress syndrome while hospitalized for pneumonia. After a respiratory arrest, an endotracheal tube was inserted. Several days later, numerous attempts to wean him from mechanical ventilation were ineffective, and a tracheostomy was created. For the first 24 hours following tracheostomy, it is important to minimize bleeding around the insertion site. The nurse can accomplish this by:**A.** Reporting any signs of crepitus immediately to the physician**B.** Deflating the cuff for 10 minutes every other hour instead of 5 minutes every hour**C.** Changing tracheostomy dressing only as necessary using one-half strength hydrogen peroxide to cleanse the site**D.** Avoiding manipulation of the tracheostomy including cuff deflation**Answer: D****Explanation:** Explanation/Reference:Explanation:(A) The tracheal cuff should not be deflated within the first 24 hours following surgery. (B) To minimize bleeding, any manipulation, including cuff deflation, should be avoided. (C) Small amounts of crepitus are expected to occur; however, large amounts or expansion of the area of crepitus should be reported to the physician. (D) The tracheostomy site may be changed as often as necessary, but site care should be done with normal saline.

NEW QUESTION: 2 Which of the following are design objects in the Documentation Center version of the Curam Impact and Relationship Analyzer (CIARA)? Which of the following are design objects in the Documentation Center version of the Curam Impact and Relationship Analyzer (CIARA)?**A.** Process flows**B.** Cascading style sheets**C.** Application properties**D.** Database columns**E.** Business process objects**Answer: A,D,E**

NEW QUESTION: 3 Refer to the exhibit. For which reason could a BGP-speaking device in autonomous system 65534 be prevented from installing the given route in its BGP table?**A.** The AS_PATH for the specified prefix exceeds the maximum number of ASs allowed.**B.** BGP does not allow the AS number 65535.**C.** The AS number of the BGP is specified in the given AS_PATH.**D.** The origin of the given route is unknown.**E.** BGP is designed only for publicly routed addresses.**Answer: C****Explanation:**BGP is considered to be a 'Path Vector' routing protocol rather than a distance vector routing protocol since it utilizes a list of AS numbers to describe the path that a packet should take. This list is called the AS_PATH. Loops are prevented because if a BGP speaking router sees it's own AS in the AS_PATH of a route it rejects the route.
