NEW QUESTION: 3Testlet: City Power & LightYou need to recommend an automated deployment solution for the new servers in the finance department.What should you include in the recommendation?Case Study Title (Case Study): COMPANY OVERVIEW OverviewCity Power & Light is an international utilities company. The company has a sales department, a finance department, and a production department.Physical LocationThe company has a main office and a branch office.EXISTING ENVIRONMENT Network InfrastructureThe network contains the following servers:A server named Server1 that runs Windows Server 2008 R2 Enterprise and has the Hyper-V role installed. Server1 hosts three virtual machines (VMs) that run Windows Server 2008 R2 Enterprise. The VMs always run.A Windows Server Update Services (WSUS) server in the main office. The WSUS server manages updates for the client computers in the main office only. Several file servers that store data on an iSCSI Storage Area Network (SAN). The file servers have multiple network cards.An enterprise root certification authority (CA) named CA1 that runs Windows Server 2008 R2.The branch office connects to the main office by using a WAN link. The WAN link is highly saturated. Allclient computers on the network connect to the Internet by using a single Internet connection at the mainoffice.Problem StatementsAll client computers run Microsoft Office 2003. The client computers for the users in the sales department run a 64-bit version of Windows 7. Sales users must be able to run a 64-bit version of Office 2010 and Office 2003 concurrently when they work offline. Office 2010 must be

deployed by using the minimum amount of administrative effort. REQUIREMENTS Business Goal City Power & Light has the following business goals: Software and hardware costs must be minimized, whenever possible. Due to power restrictions at the data center in the main office, all new servers must be deployed on VMs, whenever possible. Planned Changes City Power & Light plans to implement the following changes in their network: A WSUS server in the branch office. A robotic-based tape library for the file servers. A document management system that supports the following requirements: Retains multiple versions of a document; Automatically applies access policies to documents. A solution for managing Group Policy objects (GPOs) that supports the following: Version tracking; Offline modification; Role-based access control. Nine VMs that run Windows Server 2008 R2 Enterprise. Only five VMs will run concurrently. Two Microsoft SQL Server 2008 Enterprise servers in a failover cluster. The cluster will be attached to a hardware RAID-5 array that has five 2-terabyte drives. Five additional physical servers for the finance department. The new servers will use native-boot virtual hard disks (VHDs). The VHD images will contain a single partition. Technical Requirements City Power & Light must meet the following technical requirements: The file servers must maintain their connection to the SAN if a network card fails. The bandwidth utilization between the main office and the branch office must be minimized. Administrators in the main office must approve or reject updates for all of the client computers in all of the offices. Security Requirements City Power & Light must meet the following security requirements: All help desk technicians must be able to approve certificate requests and revoke certificates. The helpdesk technicians must be prevented from modifying the properties of the CA. All telecommunications technicians must be able to manage the virtual networks of Server1. The telecommunications technicians must be prevented from performing all other Hyper-V management task. All of the documents created by users in the finance department must be shared with all of the managers in the company. After 30 days, only those who created the documents must be able to access the documents. **A.** Microsoft System Center Virtual Machine Manager (VMM) **B.** Windows Server Migration Tools **C.** Microsoft Hyper-V Server 2008 R2 **D.** Windows Deployment Services (WDS) **Answer: D** Explanation: Explanation/Reference: VHD DEPLOYMENT In Windows Server 2008 R2, you can deploy virtual hard disk (.vhd) images of Windows Server 2008 R2 to a physical (not virtual) computer using Windows Deployment Services. In general, you deploy .vhd images in the same way that you deploy .wim images. However, using WDSUTIL at the command line is the only supported method of adding and configuring the images. In addition, the deployment must be part of an automated installation.
