NEW QUESTION: 1Examine the following topology shown in the exhibit, then answer the following question:Which of the following configuration tasks are applicable to secure Webserver from known threats? (Choose two.)**A.** Apply an antivirus profile to the port1 -> port2 firewall policy.**B.** Apply an SSL inspection profile configured for full SSL inspection.**C.** Apply a web filter profile to the port1 -> port2 firewall policy.**D.** Apply an SSL inspection profile configured for protecting SSL server.**Answer: A,D**

NEW QUESTION: 2Which two statements correctly describe distance-vector routing protocols? (Choose two)**A.** they use a variety of metrics to identify the distance to a destination network.**B.** they generate a complete topology of the network**C.** they require quick network convergence to support normal operations**D.** they update other devices on the network when one device detects a topogy chage**E.** they specify the next hop toward the destination subnet**Answer: A,E**

NEW QUESTION: 3**CORRECT TEXT**Your user matt has forgotten his passwd and you wish to reset it. Type in the command line to change his password. You are currently logged in as root.**Answer:** Explanation:passwd matt

NEW QUESTION: 4A project manager is developing a developer portal and requests that the security manager assign a public IP address so that it can be accessed by in-house staff and by external consultants outside the organization's local area network (LAN). What should the security manager do FIRST?**A.** Obtain a signed nondisclosure agreement (NDA) from the external consultants before allowing external access to the server**B.** Understand the business requirements of the developer portal**C.** Install an intrusion detection system (IDS)**D.** Perform a vulnerability assessment of the developer portal**Answer: B**Explanation:The information security manager cannot make an informed decision about the request without first understanding the business requirements of the developer portal. Performing a vulnerability assessment of developer portal and installing an intrusion detection system (IDS) are best practices but are subsequent to understanding the requirements. Obtaining a signed nondisclosure agreement will not take care of the risks inherent in the organization's application.
