Explanation: Explanation/Reference: Explanation: \* Object.prototype.constructor Returns a reference to the Object function that created the instance's prototype. Note that the value of this property is a reference to the function itself, not a string containing the function's name. The value is only read-only for primitive values such as 1, true and "test". \* The constructor property is created together with the function as a single property of func.prototype. Reference: Object.prototype.constructor
