Digital Forensics SECFND GCTI video course and practice tests Looking at this, we cannot afford to argue about the benefits that GIAC GCTI exam and certification have brought to the technological sphere.

Get ready to pass the GCTI exam right now using our GIAC GCTI exam package, which includes GIAC GCTI practice test plus an GIAC GCTI Exam Simulator and Mobile App.

In addition, if you decide to buy the GCTI study materials from our company, we can make sure that your benefits will far exceed the costs of you.

NEW QUESTION: 1標準階層のAzure IoT HubとIoTデバイスを含むAzure IoTソリューションがあります。デバイスは、1時間ごとに1つの100 KBのデバイスからクラウドへのメッセージを送信します。デバイスの1日あたりの合計メッセージ消費量を計算する必要があります。デバイスの1日の合計メッセージ消費量はどれくらいですか？ **A. 2,400 B. 0 C. 4,800 D. 1** **Answer: D** **Explanation:** 100 KB * 24 is around 2,400 bytes. The 100 KB message is divided into 4 KB blocks, and it is billed for 25 messages. 25 times 24 is 600 **Note:** The maximum message size for messages sent from a device to the cloud is 256 KB. These messages are metered in 4 KB blocks for the paid tiers so for instance if the device sends a 16 KB message via the paid tiers it will be billed as 4 messages. **Reference:** <https://azure.microsoft.com/en-us/pricing/details/iot-hub/>

NEW QUESTION: 2 **Testlet:** Graphic Design Institute, Case B You need to configure the role services on all file servers that are necessary to meet the technical requirements. Which role services should you configure? (Choose all that apply.) **Case Study Title (Case Study):** General Background You are the systems administrator for the Graphic Design Institute (GDI). GDI is a private liberal arts and technical college with campuses in multiple cities. **Technical Background** The campus locations, users, client computers, and servers are described in the following table. The campuses are connected by a fully meshed WAN. The corporate network includes Active Directory Domain Services (AD DS). Domain controllers are located on each campus. GDI uses Microsoft Windows Deployment Server (WDS) to distribute images by using Preboot Execution Environment (PXE). GDI builds images by using the Windows Automated Installation Kit (WAIK). GDI uses Microsoft Windows Server Update Services (WSUS) to distribute and manage Windows security updates and software updates. All private client computers and portable computers used by faculty and staff are members of the WSUS computer group named Staff. All shared client computers are members of the WSUS computer group named Lab Computers. All faculty and staff users are members of the global security group named GDI_Staff. All students are members of the global security group named GDI_Students. Specific servers are configured as shown in the following table. The main data center is located on the Boston campus. ADMX and ADML files are centrally stored on BODC01. All Charlotte servers reside in the CH_Servers organizational unit (OU). CHDATA01, CHDATA02, CHDATA03, and CHDATA04 reside in the CH_FileServers OU. CH_FileServers is a child OU of CH_Servers. A Group Policy object (GPO) named ServerSettings applies Windows Internet Explorer settings to all servers. **Business Requirements** After successful migrations to Windows Server 2008 R2 in Boston, New Haven, and Tacoma, GDI plans to migrate its other campuses to Windows Server 2008 R2 in advance of a full Windows 7 client computer deployment. Server deployment on the

Austin campus must be performed on weekends by using scheduled deployments. The post-migration environment must meet the following business requirements: Maximize security. Maximize data protection. Maximize existing resources. Minimize downtime. Technical Requirements The post-migration environment must meet the following security requirements: All updates must be distributed by using WSUS. All critical updates must be installed as soon as possible. All drives on the Minneapolis campus servers must have Windows BitLocker Drive Encryption enabled. The post-migration environment must meet the following data protection requirements: All servers must have automated backup routines. All backups must be replicated to the Boston data center at the end of each business week. The post-migration environment must meet the following resource requirements: Installations and recovery must be performed remotely. All department volumes on file servers must have NTFS quotas. Minimize download time for users who open Microsoft Office documents over the WAN. Ensure that users' files are always opened from the closest file server when available. Users' files must be accessible by the same path from all campuses. **A.** Windows Search Service **B.** BranchCache for network files **C.** File Server Resource Manager **D.** Distributed File System **E.** Services for Network File System **Answer: B, D** Explanation: Explanation/Reference: To fulfill the technical requirement (All department volumes on file servers must have NTFS quotas), you can configure in the Windows Explorer. FSRM is unnecessary because quota is configured on all volumes instead of specified paths/folders.

NEW QUESTION: 3 Which two statements regarding the use of Recovery manager with a database in NOARCHIVELOG mode are true? (Choose two) **A.** Recovery manager cannot be used with a database running in NOARCHIVELOG mode. **B.** For full recovery of a database not in NOARCHIVELOG mode using recovery manager, a current recovery catalog is mandatory. **C.** A DBA can only restore using RMAN if the backups were taken or registered with recovery manager. **D.** The target database must be in MOUNT mode for restriction of data files. **E.** To restore to a previous point in time using recovery manager, the command PARTIAL RECOVER must be included in the RMAN script. **Answer: C, D** Explanation: If a database in ARCHIVELOG mode to use recovery manager the target database must be MOUNTED for restriction of data files. Also DBA can only use backups were taken or registered with recovery manager for restore purposes. Incorrect Answers: C: Recovery manager can be also used with a database running in NOARCHIVELOG mode. D: For full recovery of a database not in NOARCHIVELOG mode recovery catalog is not mandatory. E: There is no PARTIAL RECOVER command used in RMAN. Oracle 8, DBA Certification Exam Guide, Jason S Couchman, p. 683-686 Chapter 14: Database Failure and Recovery
