As we all know, whether he or she can pass an exam or not, the real exam environment matters (33160X reliable study questions).

NEW QUESTION: 1Based on the configuration represented in the exhibit, which type(s) of EMC Avamar replication can be used?**A.** Root-to-root**B.** Full copy**C.** Normal and root-to-root**D.** Normal**Answer: D**

NEW QUESTION: 2What is the purpose of flow control?**A.** To ensure data is retransmitted if an acknowledgement is not received.**B.** To reassemble segments in the correct order at the destination device.**C.** To provide a means for the receiver to govern the amount of data sent by the sender.**D.** To regulate the size of each segment.**Answer: C****Explanation:**Flow control is the management of data flow between computers or devices or between nodes in a network so that the data can be handled at an efficient pace. Too much data arriving before a device can handle it causes data overflow, meaning the data is either lost or must be retransmitted. For serial data transmission locally or in a network, the Xon/Xoff protocol can be used. For modem connections, either Xon/Xoff or CTS/RTS (Clear to Send/Ready to Send) commands can be used to control data flow. In a network, flow control can also be applied by refusing additional device connections until the flow of traffic has subsided.**Reference:**

NEW QUESTION: 3You are establishing a ClusterXL environment, with the following topology: VIP internal cluster IP = 172.16.10.3; VIP external cluster IP = 192.168.10.3 Cluster Member 1: 4 NICs, 3 enabled. hme0: 192.168.10.1/24, hme1: 10.10.10.1/24, qfe2:172.16.10.1/24 Cluster Member 2: 5 NICs, 3 enabled; hme3: 192.168.10.2/24, hme1: 10.10.10.2/24, hme2:172.16.10.2/24 External interfaces 192.168.10.1 and 192.168.10.2 connect to a VLAN switch. The upstream router connects to the same VLAN switch. Internal interfaces 172.16.10.1 and 172.16.10.2 connect to a hub. 10.10.10.0 is the synchronization network. The Security Management Server is located on the internal network with IP 172.16.10.3. What is the problem with this configuration?**A.** Cluster members cannot use the VLAN switch. They must use hubs.**B.** The Security Management Server must be in the dedicated synchronization network, not the internal network.**C.** There is an IP address conflict.**D.** The Cluster interface names must be identical across all cluster members.**Answer: C**
