NEW QUESTION: 3A company has an HP Network Protector SDN Application solution that controls HP 5406R zl2 switches. Why should the network administrator ensure that HP switches use service insertion tunnels, rather than OpenFlow, to send traffic to the HP VAN SDN Controller?
A. because the service insertion tunnels provide faster failover capabilities
B. because the service insertion tunnels provide per packet statistics
C. because the service insertion tunnels provide a higher packet_in rate
D. because the service insertion tunnels provide stronger security
Answer: C

NEW QUESTION: 4You need a new conditional access policy that has an assignment for Office 365 Exchange Online.You need to configure the policy to meet the technical requirements for Group4.Which two settings should you configure in the policy? To answer, select the appropriate settings in the answer area.NOTE: Each correct selection is worth one point.
Answer: Explanation:Explanation:The policy needs to be applied to Group4 so we need to configure Users and Groups.The Access controls are set to Block accessWe therefore need to exclude compliant devices.From the scenario:Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.Note: When a device enrolls in Intune, the device information is updated in Azure AD to include the device

compliance status. This compliance status is used by conditional access policies to block or allow access to e-mail and other organization resources.References:
