Trying to become a E-S4CPE-2405 certified professional.

NEW QUESTION: 1文を完成させるには、回答領域で適切なオプションを選択します。 **Answer:** Explanation:

NEW QUESTION: 2A network technician must utilize multimode fiber to uplink a new networking device. Which of the following Ethernet standards could the technician utilize? (Select TWO). **A.** 10GBase-T **B.** 1000Base-TC **C.** 1000Base-SRD **D.** 10GBase-LRE **E.** 10GBase-SRF. 1000Base-LR **Answer: C, E** Explanation: Explanation 1000BASE-SX is a fiber optic Gigabit Ethernet standard for operation over multi-mode fiber with a distance capability between 220 meters and 550 meters. 10Gbase-SR is a 10 Gigabit Ethernet LAN standard for operation over multi-mode fiber optic cable and short wavelength signaling.

NEW QUESTION: 3 Testlet: Tailspin Toys Explanation Explanation/Reference: New security events are not being written to the current Security event log in the tailspintoys.com domain. However, old security events are still being maintained in the log. You need to meet the security event log requirements for the tailspintoys.com domain. Which Group Policy setting or settings should you select? CASE SCENARIO General Background You are the Windows Server Administrator for Tailspin Toys. Tailspin Toys has a main office and a manufacturing office. Tailspin Toys recently acquired Wingtip Toys and is in the beginning stages of Merging the IT environments. Wingtip Toys has a main office and a sales office. Technical Background The companies use the network subnets indicated in the following table: The Tailspin Toys network and the Wingtip Toys are connected by a point-to-point dedicated 45 Mbps circuit that terminates in the main offices. The current Tailspin Toys server topology is shown in the following table: The Tailspin Toys environment has the following characteristics: All servers are joined to the tailspintoys.com domain. In the Default Domain Policy, the Retain old events Group Policy setting is enabled. An Active Directory security group named "Windows System Administrators" is used to control all files and folders on TT-PRINT01. A Tailspin Toys administrator named Marx has been delegated rights to multiple Organizational Units (OUs) and object in the tailspintoys.com domain. Tailspin Toys developers use Hyper-V Virtual Machines (VM's) for development. There are 10 development VM's named TT-DEV01 to

TT-DEV20. The current Wingtip Toys server topology is shown in the following table: All servers in the Wingtip Toys environment are joined to the wingtip toys.com domain. Infrastructure Services You must ensure that the following infrastructure services requirements are met: All domain zones must be stored as Active Directory-integrated zones. Only DNS servers located in the Tailspin Toys main offices may communicate with the DNS servers at Wingtip Toys. Only DNS servers located in the Wingtip Toys main offices may communicate with the DNS servers at Tailspin Toys. All tailspintoys.com resources must be resolved from the Wingtip Toys offices. All wingtip toys.com resources must be resolved from the Tailspin toys offices. Certificates must be distributed automatically to all Tailspin Toys and Wingtip Toys computers. Delegated Administration You must ensure that the following delegated administration requirements are met: Tailspin Toys IT security administrators must be able to create, modify and delete user objects in the wingtip.com domain. Members of the Domain Admins Group in the tailspintoys.com domain must have full access to the wingtip toys.com Active Directory environment. A delegation policy must grant minimum access rights and simplify the process of delegating rights. Minimum permissions must always be delegated to ensure that the least privilege is granted for a job task. Members of the TAILSPINTOYSHelpdesk group must be able to update drivers and add printer ports on TT-PRINT01. Members of the TAILSPINTOYSHelpdesk group must not be able to cancel a print job on TT-PRINT01. Tailspin Toys developers must be able to start, stop and apply snapshots to their development VM's. IT Security Server security must be automated to ensure that newly deployed servers automatically have the same security configurations as existing servers. Auditing must be configured to ensure that the deletion of users objects and OUs is logged. Microsoft Word and Microsoft Excel files must be automatically encrypted when uploaded to the Confidential documents library on the Tailspin Toys Microsoft SharePoint site. Multi factor authentication must control access to Tailspin Toys domain controllers. All file and folder auditing must capture the reason for access. All folder auditing must capture all delete actions for all existing folders and newly created folders. New events must be written to the Security event log in the tailspintoys.com domain and retained indefinitely. Drive X: on the TT-FILE01 must be encrypted by using Windows BitLocker Drive Encryption and must be automatically unlock. Hot Area: **Answer:** Explanation: Explanation/Reference:

NEW QUESTION: 4A. TSOB. PVDRMAC. LROD. SR-IOV **Answer: A, C** Explanation: Using TSO and LRO on physical and virtual machine NICs improves the performance of ESX/ESXi hosts by reducing the CPU overhead for TCP/IP network operations. The host uses more CPU cycles to run applications. If TSO is enabled on the transmission path, the NIC divides larger data chunks into TCP segments. If TSO is disabled, the CPU performs segmentation for TCP/IP. TSO is referred to as LSO (Large Segment Offload or Large Send Offload) in the latest VMXNET3 driver attributes. LRO reassembles incoming network packets into larger buffers and transfers the resulting larger but fewer packets to the network stack of the host or virtual machine. The CPU has to process fewer packets than when LRO is disabled, which reduces its utilization for networking.
