NEW QUESTION: 1You are using Amazon SES as an email solution but are unsure of what its limitations are. Which statement below is correct in regards to that?**A.** Sending limits are based on messages rather than on recipients**B.** New Amazon SES users who have received production access can send up to 1,000 emails per 2 4-hour period, at a maximum rate of 10 emails per second.**C.** Every Amazon SES sender has a the same set of sending limits**D.** Every Amazon SES sender has a unique set of sending limits**Answer: D****Explanation:**Amazon Simple Email Service (Amazon SES) is a highly scalable and cost-effective email-sending service for businesses and developers. Amazon SES eliminates the complexity and expense of building an in-house email solution or licensing, installing, and operating a third-party email service for this type of email communication. Every Amazon SES sender has a unique set of sending limits, which are calculated by Amazon SES on an ongoing basis: Sending quota - the maximum number of emails you can send in a 24-hour period. Maximum send rate - the maximum number of emails you can send per second. New Amazon SES users who have received production access can send up to 10,000 emails per 24-hour period, at a maximum rate of 5 emails per second. Amazon SES automatically adjusts these limits upward, as long as you send high-quality email. If your existing quota is not adequate for your needs and the system has not automatically increased your quota, you can submit an SES Sending Quota Increase case at any time. Sending limits are based on recipients rather than on messages. You can check your sending limits at any time by using the Amazon SES console. Note that if your email is detected to be of poor or questionable quality (e.g., high complaint rates, high bounce rates, spam, or abusive content), Amazon SES might temporarily or permanently reduce your permitted send volume, or take other action as AWS deems appropriate.
