**NEW QUESTION: 1** Which two commands will display the current IP address and basic Layer 1 and 2 status of an interface? (Choose two.)  
**A.** router#show version  
**B.** router#show running-config  
**C.** router#show protocols  
**D.** router#show ip interface  
**E.** router#show controllers  
**Answer: C, E**

**NEW QUESTION: 2** As part of the Scoping Assessment and Statement Of Work, you have identified the following: -The implementation is for a single location -The implementation requires two ISV solutions -Business requirements include customization of medium complexity. You need to analyze the customer's current and future business strategies. What should you do?  
**A.** Start by creating a Solution Design Document, and then setup the development and production environments.  
**B.** Start with a Kick-Off meeting to align all team members, followed by analysis workshops in which you gather business requirements for the functional domains.  
**C.** Start with a Kick-Off meeting to align all team members, followed by Solution Overview trainings to create awareness and acceptance of the new solution among key users.  
**D.** Start with gathering business requirements in workshops, followed by a presentation of the results in a Kick-Off meeting to align all team members with the scope results.  
**Answer: C**

**NEW QUESTION: 3** Refer to the network exhibit. The external server shown in the exhibit requires redundancy that uses link aggregation with LACP. Which solution meets this criteria?  
**A.** Comware switches that use distributed trunking, or Provision switches that use meshed stacking  
**B.** Comware or Provision switches that use distributed trunking  
**C.** Comware switches that use IRF or Provision switches, which use distributed trunking  
**D.** Comware switches that use IRF or Provision switches, which use meshed stacking  
**Answer: B**  
Explanation: The correct answer is d. Choice a is incorrect because meshed stacking does not support distributed LACP. Choices b and c are incorrect because Comware switches do not support distributed trunking.
