**NEW QUESTION: 1**You need to create a stored procedure to update a table named Sales.Customers. The structure of the table is shown in the exhibit. (Click the exhibit button.) The stored procedure must meet the following requirements:- Accept two input parameters.- Update the company name if the customer exists.- Return a custom error message if the customer does not exist.Which five Transact-SQL segments should you use to develop the solution? To answer, move the appropriate Transact-SQL segments from the list of Transact-SQL segments to the answer area and arrange them in the correct order.NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.**Answer:** Explanation:

**NEW QUESTION: 2**SIMULATIONConvert the Celsius temperature of 100 degrees into degrees Fahrenheit.**Answer:** Explanation:212

**NEW QUESTION: 3**You have an Azure subscription named Subscription1. Subscription1 contains two Azure virtual machines named VM1 and VM2. VM1 and VM2 run Windows Server 2016.VM1 is backed up daily by Azure Backup without using the Azure Backup agent.VM1 is affected by ransomware that encrypts data.You need to restore the latest backup of VM1.To which location can you restore the backup? To answer, select the appropriate options in the answer area.NOTE: Each correct selection is worth one point.**Answer:** Explanation:Explanation: Box 1 : VM1 and VM2 onlyWhen recovering files, you can't restore files to a previous or future operating system version.You can restore files from a VM to the same server operating system, or to the compatible client operating system. Therefore -"VM1 and VM2 only" is the best answer since both run on Windows Server 2016."A new Azure virtual machine only" ,this will also work but why to create unnecessary new VM in Azure if existing VM will do the task. So this option is incorrect.Box 2 : VM1 or A new Azure virtual machine onlyWhen restoring a VM, you can't use the replace existing VM option for encrypted VMs. This option is only supported for unencrypted managed disks. And also You can restore files from a VM to the same server operating system, or to the compatible client operating system only. Hence "VM1 or A new Azure virtual machine only" is correct answer.References:
