NEW QUESTION: 1In an IT organization, some specific tasks require additional detailed controls to ensure that the workers perform their job correctly. What do these detailed controls specify? (Choose three)**A.** How to lock a user account after unsuccessful logon attempts**B.** The way system security parameters are set**C.** How output data is verified before being accepted into an application**D.** How the department handles acquisitions, security, delivery, implementation, and support of IS services**Answer: A,B,D****Explanation:**Some of the specific tasks require additional detailed controls to ensure that the workers perform their job correctly. These controls refer to some specific tasks or steps to be performed such as: The way system security parameters are set. How input data is verified before being accepted into an

application. How to lock a user account after unsuccessful logon attempts. How the department handles acquisitions, security, delivery, implementation, and support of IS services. Answer C is incorrect. Input data should be verified before being accepted into an application.

NEW QUESTION: 2 You administer a Microsoft SQL Server database. The database has a table named Customers owned by UserA and another table named Orders owned by UserB. You also have a stored procedure named GetCustomerOrderInfo owned by UserA.

GetCustomerOrderInfo selects data from both tables. You create a new user named UserC. You need to ensure that UserC can call the GetCustomerOrderInfo stored procedure. You also need to assign only the minimum required permissions to UserC. Which permission or permissions should you assign to UserC? Each correct answer presents part of the solution. **A.** The Control permission on GetCustomerOrderInfo **B.** The Select permission on Customers **C.** The Take Ownership permission on Customers **D.** The Execute permission on GetCustomerOrderInfo **E.** The Take Ownership permission on Orders **F.** The Select permission on Orders **Answer: D, F**

Explanation: Explanation/Reference: Explanation: Due to ownership chaining, you would only need to give Execute permissions to UserC to access the Customers table since UserA is the owner. You would also need to assign Select permission on the Orders table, as it is owned by UserB. **Note:** How Permissions Are Checked in a Chain When an object is accessed through a chain, SQL Server first compares the owner of the object to the owner of the calling object. This is the previous link in the chain. If both objects have the same owner, permissions on the referenced object are not evaluated. **References:**

[https://technet.microsoft.com/en-us/library/ms188676\(v=sql.105\).aspx](https://technet.microsoft.com/en-us/library/ms188676(v=sql.105).aspx)

NEW QUESTION: 3 What is the license file for Avaya Aura@ Conferencing for Turnkey based on? **A.** The MAC address of the System manager with which Avaya Aura@ Conferencing is associated **B.** The MAC address of the Session manager with which Avaya Aura@ Conferencing is associated **C.** The Media Server MAC address **D.** The Avaya Aura@ Conferencing MAC address

Answer: D **Explanation:** Licensing enforcement is a new feature in the Avaya Aura@ Conferencing Release 8.0. The enforcement rules are identical for the Avaya Aura@ Conferencing for Turnkey solution and the Avaya Aura@ Conferencing for Avaya Aura@ solution. **Reference:** <https://downloads.avaya.com/css/P8/documents/100182302>

NEW QUESTION: 4 A system administrator has successfully configured Content Federation Services for IBM FileNet Image Services and needs to start federating documents from Image Services to the IBM FileNet P8 Content Engine. What is the name of the tool that is used to start federating the documents in the above scenario? **A.** Remote Admin Task Manager **B.** Remote Xapex Interface **C.** Remote Admin Console **D.** Remote Configuration Manager **Answer: A**
