NEW QUESTION: 2Refer to the exhibit.How must router A be configured so that it only sends Cisco Discovery Protocol Information to router C?**A.** Option A**B.** Option C**C.** Option D**D.** Option B**Answer: C**

NEW QUESTION: 3

ホストがDHCPサーバーからIPアドレスを取得できない場合、次のうちどれが当てはまりますか？

A. デフォルトゲートウェイ用のARPエントリはありません。**B.**

ホストのネットワークアダプター上のDHCPサーバーのIPアドレス構成が正しくありません。**C.** DNSは機能していません。**D.**

DHCPサーバーで使用可能なすべてのIPアドレスは既にリースされています。**Answer: D**

NEW QUESTION: 4Which of the following projects would likely result in multiple Internal Rates of Return?Project AInitial investment outlay: (\$450,000)t1: \$400,000t2: (\$40,000)t3: \$190,000Project BInitial investment outlay: (\$50,000)t1: \$0.00t2: \$0.00t3: \$75,000Project CInitial investment outlay: (\$300,000)t1: \$15,000t2: (\$34,000)t3: \$0.00t4: \$400,000Project DInitial investment outlay: (\$100,000)t1: \$150,000t2: \$380,000t3: \$45,000t4: \$45,000Project EInitial investment outlay: (\$1,000,000)t1: \$1,500,000t2: \$1,300t3: \$0.00t4: \$60,000**A.** None of these choices**B.** Project C, Project E**C.** Project A, Project C,**D.** The answer cannot be determined from the information provided**E.** Project D, Project E**F.** Project B, Project D**Answer: C****Explanation:** Explanation/Reference:Explanation:In evaluating projects with "non-normal cash flows" the Internal Rate of Return method will often produce multiple IRRs which leads to an incorrect accept/reject decision. Non-normal cash flows are defined as cash flows in which the sign changes more than once. Projects A, and C involve cash outflows superimposed within their cash inflows, resulting in a sign change from positive to negative and negative to positive. In examining projects such as these, it is advisable to use either the NPV or MIRR methods, which are not subject to the problem of multiple IRRs. From observation alone, we can determine that project A and C are non-normal projects, and are thus likely to result in multiple IRR calculations. While project B, D, and E have periods of zero cash flow, they have only one change of sign in the overall cash flow process, and therefore should be characterized as "normal." While the cost of capital has been provided, it is not necessary for the determination of the correct answer in this case. What you should look for are projects with non-normal cash flows, and this should not involve any computational analysis.Besides, the cost of capital is not

incorporated into the Internal Rate of Return calculation, rather is a component of the NPV and MIRR.
