So when you are ready to take the exam, you can rely on our Salesforce-AI-Specialist learning materials, Our products are created with utmost care and professionalism, Our website is the number one choice among the exam dump vendors, especially for the one who are going to clear Salesforce-AI-Specialist practice exam faster with less time and money.

We guarantee that if you fail the exam we will refund all money to you that you pay on the braindumps for Salesforce-AI-Specialist certification.

NEW QUESTION: 1 Ihr Netzwerk enthält eine Active Directory-Gesamtstruktur. Die Gesamtstruktur enthält 5.000 Benutzerkonten. Ihr Unternehmen plant, alle Netzwerkressourcen nach Azure zu migrieren und das lokale Rechenzentrum außer Betrieb zu setzen. Sie müssen eine Lösung empfehlen, um die Auswirkungen auf Benutzer nach der geplanten Migration zu minimieren. Was solltest du empfehlen?
A. Weisen Sie alle Benutzer an, ihr Passwort zu ändern
B. Synchronisieren Sie alle Active Directory-Benutzerkonten mit Azure Active Directory (Azure AD).
C. Erstellen Sie für jeden Benutzer ein Gastbenutzerkonto in Azure Active Directory (Azure AD).
D. Implementieren Sie die Azure Multi-Factor-Authentifizierung (MFA).
Answer: B

Explanation: Explanation To migrate to Azure and decommission the on-premises data center, you would need to create the 5,000 user accounts in Azure Active Directory. The easy way to do this is to sync all the Active Directory user accounts to Azure Active Directory (Azure AD). You can even sync their passwords to further minimize the impact on users. The tool you would use to sync the accounts is Azure AD Connect. The Azure Active Directory Connect synchronization services (Azure AD Connect sync) is a main component of Azure AD Connect. It takes care of all the operations that are related to synchronize identity data between your on-premises environment and Azure AD.

NEW QUESTION: 4 DRAG DROP A company's environment includes an Active Directory Domain Services (AD DS) domain. The print server runs Windows Server 2008 R2 and all printers are networked by using TCP/IP. Only domain users have permissions to access the print server and printers published in AD DS. A visitor is connected to the network with a computer running Windows 7 Professional. The computer is not joined to the company domain. The user does not have a domain user account. You have a copy of the printer drivers on a USB flash drive because the drivers are not included with Windows 7. These drivers have never been installed on the visitor's computer. The visitor wants to print to a network printer. You need to install the printer on the visitor's computer. Which two actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.) Select and Place: **Answer:** Explanation:
