D. Escape "<" and ">" parameters that displayed or evaluated by the JavaScript interpreter.
E. Treat all user-supplied input as unsafe, and white list known good characters
Answer: A,C

NEW QUESTION: 3A _____ eliminates the need to remove or install materials.
A. Factory fabricated sleeve system
B. Cable transit system
C. Fire-rated pathway device
D. Cast-in-place device
Answer: C

NEW QUESTION: 4Amazon Elastic MapReduce (Amazon

EMR) を使用すると、膨大な量のデータを分析および処理できます。クラスターは、Hadoopと呼ばれるオープンソースフレームワークを使用して管理されます。You have set up an application to run Hadoop jobs. The application reads data from DynamoDB and generates a temporary file of 100 TBs. The whole process runs for 30 minutes and the output of the job is stored to S3. Which of the below mentioned options is the most cost effective solution in this case?**A.** Use an on demand instance to run Hadoop jobs and configure them with ephemeral storage for output file storage.**B.** Use an on demand instance to run Hadoop jobs and configure them with EBS volumes for persistent storage.**C.** Use Spot Instances to run Hadoop jobs and configure them with EBS volumes for persistent data storage.**D.** Use Spot Instances to run Hadoop jobs and configure them with ephemeral storage for output file storage.**Answer: D****Explanation:**Explanation AWS EC2 Spot Instances allow the user to quote his own price for the EC2 computing capacity. The user can simply bid on the spare Amazon EC2 instances and run them whenever his bid exceeds the current Spot Price. The Spot Instance pricing model complements the On-Demand and Reserved Instance pricing models, providing potentially the most cost-effective option for obtaining compute capacity, depending on the application. The only challenge with a Spot Instance is data persistence as the instance can be terminated whenever the spot price exceeds the bid price. In the current scenario a Hadoop job is a temporary job and does not run for a longer period. It fetches data from a persistent DynamoDB. Thus, even if the instance gets terminated there will be no data loss and the job can be re-run. As the output files are large temporary files, it will be useful to store data on ephemeral storage for cost savings.
