Our C_S4PPM_2021 online test engine can greatly augment your ability to deal with the exam.

NEW QUESTION: 1What must you do to request access to a customer instance? Please choose the correct answer. Response: **A.** Gain customer approval **B.** Assign the customer to your provisioning IDC. **C.** Have access to the customer's signed contract **D.** Enable Company Settings in Provisioning for the customer **Answer: A**

NEW QUESTION: 2You are deployment Windows server 2016 virtual machine (VM) using the Azure portal for company website. You have the following information about the VM: VM name* Administrator username* Administrator password* Resource location* Number of virtual processors* Amount of memory You need to create the VM while minimizing costs. What additional information do you need to create the VM? **A.** Storage account name **B.** VM disk type **C.** VM size **D.** Public inbound port(S) **Answer: A**

NEW QUESTION: 3 Hotspot Question - RIPv2 Troubleshooting II Users complain that they are unable to reach internet sites. You are troubleshooting internet connectivity problem at main office. Which statement correctly identifies the problem on Router R1? **A.** NAT configurations on the interfaces are incorrectly configured **B.** NAT translation statement incorrectly configured. **C.** Only static NAT translation configured for the server, missing Dynamic NAT or Dynamic NAT overloading for internal networks. **D.** Interesting traffic for NAT ACL is incorrectly configured. **Answer: A** Explanation: If all users cannot access the Internet, then R1 is most likely to cause the problem so we should check it first. From the "show running-config" command we will see: Here we see that interface E0/0 (connected to ISP) has been configured as "nat inside" while interfaces E0/1 & E0/2 (connected to our company) have been configured as "nat outside". This is not correct because "nat inside" should be configured with interfaces connected to our company while "nat outside" should be configured with interfaces connected to the internet. Therefore, we can conclude the NAT configuration on these interfaces is not correct.
