**NEW QUESTION: 3**A SysOps Administrator needs a report of all IAM users and the status of MFA for each user.Which IAM feature would meet this requirement?**A.** IAM Roles report**B.** IAM MFA report**C.** IAM Credential report**D.** IAM User Policies report**Answer: C**Explanation:Getting Credential Reports for Your AWS AccountYou can generate and download a credential report that lists all users in your account and the status of their various credentials, including passwords, access keys, and MFA devices. You can get a credential report from the AWS Management Console, the AWS SDKs and Command Line Tools, or the IAM API.You can use credential reports to assist in your auditing and compliance efforts. You can use the report to audit the effects of credential lifecycle requirements, such as password and access key rotation. You can provide the report to an external auditor, or grant permissions to an auditor so that he or she can download the report directly.You can generate a credential report as often as once every four hours. When you request a report, IAM first checks whether a report for the AWS account has been generated within the past four hours. If so, the most recent report is downloaded. If the most recent report for the account is older than four hours, or if there are no previous reports for the account, IAM generates and downloads a new report.
