**NEW QUESTION: 1** To address shared monitoring and testing responsibilities in a cloud configuration, the provider might offer all these to the cloud customer except:  
**A.** Security control administration  
**B.** Access to audit logs and performance data  
**C.** SIM, SEIM, and SEM logs  
**D.** DLP solution results  
**Answer: A**  
**Explanation:** Explanation While the provider might share any of the other options listed, the provider will not share administration of security controls with the customer. Security controls are the sole province of the provider.

**NEW QUESTION: 2** **A.** Azure File Storage  
**B.** Azure Cosmos DB  
**C.** Azure Data Lake  
**D.** Azure Blob storage  
**Answer: B**

**NEW QUESTION: 3** Which three statements about access lists are true? (Choose three.)  
**A.** Extended access lists should be placed as near as possible to the source.  
**B.** Standard access lists filter on the destination address.  
**C.** Standard access lists should be placed as near as possible to the source.  
**D.** Extended access lists should be placed as near as possible to the destination.  
**E.** Standard access lists should be placed as near as possible to the destination.  
**F.** Standard access lists filter on the source address.  
**Answer: A,E,F**

**NEW QUESTION: 4** What is Converged Networking?  
**A.** An approach to computer networking that allows network administrators to manage network services through abstraction of lower

level functionality **B**. The creation of a computing fabric consisting of interconnected nodes that look a fabric when viewed collectively from a distance **C**. The ability to merge multiple data protocols (e.g. iSCSI, Fibre Channel, Ethernet) on the same server I/Q interface **D**. A system that changes its structure, behavior, or resources according to demand **Answer: A** Explanation: Data centers built one-silo-at-a-time are inefficient and inflexible. HP Converged System integrated systems give you the agility to adapt to business and customer needs. **Fast:** Deploy new systems in weeks instead of months, set up IT services in seconds, and fix problems before they disrupt operations **Simple:** Manage as one instead of as many with an intuitive, unified tool **Efficient:** Automate manual processes, increase productivity, reduce staff costs by up to 217% and TCO by up to 40% more than the competition **Note:** Network convergence refers to the provision of telephone, video and data communication services within a single network. In other words, one pipe is used to deliver all forms of communication services. The process of Network Convergence is primarily driven by development of technology and demand. One main goal of such integration is to deliver better services and lower prices to consumers. Users are able to access a wider range of services, choose among more service providers. **Reference:** <http://www8.hp.com/us/en/business-solutions/converged-systems/>
