We have three versions for customer to choose, namely, H19-427_V1.0 online version of App, PDF version, software version.

NEW QUESTION: 1 Ein Windows 10 Enterprise-Clientcomputer verfügt über zwei Festplattenlaufwerke: ein Systemlaufwerk und ein Datenlaufwerk. Sie bereiten die Sicherung des Computers vor, bevor Sie ein sich entwickelndes Softwareprodukt installieren. Sie haben folgende Anforderungen: Der Systemdatenträger, der Teil der Sicherung ist, muss in Windows bereitgestellt werden können. Die Systemfestplatte, die Teil der Sicherung ist, muss bootfähig sein. Das Backup muss wiederherstellbar sein, falls eine Festplatte ausfällt. Die Sicherung muss Daten von beiden Festplatten enthalten. Sie müssen eine Sicherungsmethode auswählen. Welche Methode solltest du anwenden? **A.** Dateiverlauf **B.** Speicherpool **C.** Systemabbild **D.** Systemreparaturdatenträger **Answer: C** **Explanation:** Erläuterung Erläuterung **Verweise:** <https://www.howtogeek.com/239312/how-to-restore-system-image-backups-on-windows-7-8-and-10/>

NEW QUESTION: 2 Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar. When you are finished performing all the tasks, click the 'Next' button. Note that you cannot return to the lab once you click the 'Next' button. Scoring occurs in the background while you complete the rest of the exam. Overview The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab You may start the lab by clicking the Next button. You need to deploy an Azure virtual machine named VM1004a based on an Ubuntu Server image, and then

to configure VM1004a to meet the following requirements:- The virtual machines must contain data disks that can store at least 15 TB of data- The data disk must be able to provide at least 2,000 IOPS- Storage costs must be minimized

What should you do from the Azure portal?
Answer: Explanation: See solution below.
Explanation
Step 1: Open the Azure portal.
Step 2: On the left menu, select All resources. You can sort the resources by Type to easily find your images.
Step 3: Select the image you want to use from the list. The image page opens.
Step 4: Select Create VM from the menu.
Step 5: Enter the virtual machine information. Select VM1004a as the name for the first Virtual machine. The user name and password entered here will be used to log in to the virtual machine. When complete, select OK. You can create the new VM in an existing resource group, or choose Create new to create a new resource group to store the VM.
Step 6: Select a size for the VM. To see more sizes, select View all or change the Supported disk type filter. To support 15 TB of data you would need a Premium disk.
Step 7: Under Settings, make changes as necessary and select OK.
Step 8: On the summary page, you should see your image name listed as a Private image. Select Ok to start the virtual machine deployment.

NEW QUESTION: 3A security technician has been receiving alerts from several servers that indicate load balancers have had a significant increase in traffic. The technician initiates a system scan. The scan results illustrate that the disk space on several servers has reached capacity. The scan also indicates that incoming internet traffic to the servers has increased. Which of the following is the MOST likely cause of the decreased disk space?
A. Misconfigured devices
B. Logs and events anomalies
C. Unauthorized software
D. Authentication issues

Answer: C
