A user complains that they cannot reach a destination host using Telnet. The user expresses concern that the SRX Series device is blocking the connection attempt. You check the security policy log on the SRX device and see the entry shown in the exhibit. Based on the security policy log entry, which three statements describe why the user is unable to use Telnet to reach the destination host? (Choose three.)
A. The destination host does not have a valid route for the user's PC.
B. A trace options flag is set on the SRX device to drop the telnet traffic.
C. The destination host is not listening on the requested service.
D. No security policy is configured on the SRX device to match the request.
E. Another device between the SRX device and destination host is blocking the request.
Answer: A, C, E
Explanation: Based on security policy log entry we can confirm that "allow-telnet" security policy is configured on the SRX device and SRX device does not receive any packet from remote telnet server as the both server-packets(server-bytes) are zero. So the possible options are B, C, D.
