Meanwhile, our H11-861_V3.0 exam materials are demonstrably high effective to help you get the essence of the knowledge which was convoluted, Many candidates are looking for valid H11-861_V3.0 test torrent & H11-861_V3.0 exam questions on internet.

NEW QUESTION: 1An organization is implementing a password management application which requires that all local administrator passwords be stored and automatically managed. Auditors will be responsible for monitoring activities in the application by reviewing the logs. Which of the following security controls is the BEST option to prevent auditors from accessing or modifying passwords in the application?**A.** Role-based access with read-only**B.** Mandatory access control**C.** Create user accounts for the auditors and assign read-only access**D.** Time of day restrictions**Answer: A****Explanation:**Auditors (employees performing the auditor role) will have access application by reviewing the logs. We can therefore assign access based on employee role. This is an example of Role-based access control (RBAC).To prevent the auditors from modifying passwords in the application, we need to ensure that they do not have write access. Therefore, you should assign only read access.Role-Based Access Control (RBAC) models approach the problem of access control based on established roles in an organization. RBAC models implement access by job function or by responsibility. Each employee has one or more roles that allow access to specific information. If a person moves from one role to another, the access for the previous role will no longer be available.Instead of thinking "Denise needs to be able to edit files," RBAC uses the logic "Editors need to be able to edit files" and "Denise is a member of the Editors group." This model is always good for use in an environment in which there is high employee turnover.

NEW QUESTION: 2You have a workspace that contains 10 dashboards. A dashboard named

Sales Data from two datasets. You discover that users are unable to find data on the dashboard by using natural language queries. You need to ensure that the users can find data by using natural language queries. What should you do? **A.** From the properties of the dashboard, modify the Q&A settings. **B.** From the Sales Data dashboard, modify the dashboard as a Favorite. **C.** From the properties of the datasets, modify the Q&A and Cortana settings. **D.** From the settings of the workspace, modify the Language Settings. **Answer: C**
Explanation: Explanation/Reference: References:
