Reliable Desktop-Specialist Valid Dumps Demo – 100% Latest Tableau Desktop Specialist Exam Braindumps Pdf

EXIN Desktop-Specialist Materials - So you have no reason not to choose it, About our Desktop-Specialist test questions, it is one of authorized test materials for candidates who hold ambitious aims in the area.

With the help of Tableau Desktop Specialist Exam practical training, you can pass the Desktop-Specialist test with high efficiency and less time, You still have enough time to work and relax.

Here, we not only provide you with the most related Desktop-Specialist valid practice torrents, but also some Desktop-Specialist free reference, We assume all the responsibilities our Desktop-Specialist simulating practice may bring you foreseeable outcomes and you will not regret for believing in us assuredly.

But if you are unlucky to fail Desktop-Specialist exam, we definitely promise that we will give you a full refund to make up for your loss when you give your failed certification to us. In addition, there is another choice for you.

Our professional experts are your best reliable backup for your exam, We offer you free update for 365 days if you buying Desktop-Specialist exam dumps from us, So as long as you buy our Desktop-Specialist learning guide, you can always have the latest exam questions and answers.

NEW QUESTION: 1 A network technician has just installed a TFTP server on the administrative segment of the network to store router and switch configurations. After a transfer attempt to the server is made, the process errors out. Which of the following is a cause of the error?
A. Port 69 is blocked on a router between the network segments
B. Anonymous users were not used to log into the TFTP server
C. An incorrect password was used and the account is now locked
D. Only FTP can be used to copy configurations from switches
Answer: A
Explanation/Reference: Explanation: The question states that the TFTP server is installed on the "administrative segment of the network". This implies that the network has multiple segments (subnets) and TFTP server is on a different network segment to other computers. For a computer on one subnet to connect to a computer on a different subnet, a router is required to route traffic between the two subnets. Routers often include firewalls so they can be configured to allow specific traffic to be routed between the subnets and block unwanted traffic. TFTP uses UDP port 69. The most likely cause of the connection timeout error in the question is that the firewall has not been configured to allow traffic using UDP port 69.

NEW QUESTION: 2 A. Option A B. Option B C. Option C D. Option D E. Option E
Answer: A, E
Explanation: There are only three port states left in RSTP that correspond to the three possible operational states. The 802.1D disabled, blocking, and listening states are merged into a unique 802.1w discarding state. Is Port Learning RSTP (802.1D) in (802.1w) Port Included MAC Port State Active State Addresses? Topology? Disabled Discarding No No Blocking Discarding No No Listening Discarding Yes No Learning Learning Yes Yes Forwarding Forwarding Yes Yes
