NEW QUESTION: 1You have the following tables in a data model.You create a PivotTable to display SaleAmount by Month. A sample of the results are shown in the following table.You need to ensure that the data appears in chronological order.What should you do?**A.** In the data model, modify the Sort by Column setting for Sales[Date]**B.** In the data model, modify the Sort By Column setting for Date[Month Year]**C.** From PivotTable Fields, add Date[Year] to the Rows area**D.** From PivotTable Fields, modify the Field Settings for Date[Month Year]**Answer: D**

NEW QUESTION: 2A company is designing a new highly available web application on AWS. The application requires consistent and reliable connectivity from the application servers in AWS to a backend REST API hosted in the company's on-premises environment. The backend connection between AWS and on-premises will be routed over an AWS Direct Connect connection through a private virtual interface. Amazon Route 53 will be used to manage private DNS records for the application to resolve the IP address on the backend REST API.Which design would provide a reliable connection to the backend API?**A.** Create an IPsec VPN connection routed over the public internet from the on-premises data center to AWS and attach it to the same virtual private gateway as the Direct Connect connection.**B.** Install a second cross connect for the same Direct Connect connection from the same network carrier, and join both connections to the same link aggregation group (LAG) on the same private virtual interface.**C.** Install a second Direct Connect connection from a different network carrier and attach it to the same virtual private gateway as the first Direct Connect connection.**D.** Implement at least two backend endpoints for the backend REST API, and use Route 53 health checks to monitor the availability of each backend endpoint and perform DNS-level failover.**Answer: A**
