Yes****B. No****Answer: A**Explanation:Explanation/Reference:Explanation:Use a matching rule, and use completeness and uniqueness data to determine what weight to give a field in the matching process.If there is a high level of uniqueness in a field, using the field in a matching policy can decrease the matching results, so you may want to set the weight for that field to a relatively small value. If you have a low level of uniqueness for a column, but low completeness, you may not want to include a domain for that column.References:
