Answer: A,C

NEW QUESTION: 2 Which HP service provides preconfigured and pre-integrated solutions with optional onsite startup?
A. HP Integrity Solution Service
B. HP Technology Service
C. HP Factory Express
D. HP Consulting Service
Answer: C

NEW QUESTION: 3 **A.** Option D **B.** Option E **C.** Option A **D.** Option C **E.** Option B
Answer: D,E
Explanation: Explanation Dynamic or Stateful Packet-Filtering Firewalls Stateful inspection is a firewall architecture classified at the network layer; although, for some applications it can analyze traffic at Layers 4 and 5, too. Unlike static packet filtering, stateful inspection tracks each connection traversing all interfaces of the firewall and confirms that they are valid. Stateful packet filtering maintains a state table and allows modification to these security rules dynamically. The state table is part of the internal structure of the firewall. It tracks all sessions and inspects all packets passing through the firewall. Although this is the primary Cisco Firewall technology, it has some limitations: * Cannot prevent application layer attacks. * Not all protocols are stateful. * Some applications open multiple connections. * Does not support user authentication. <http://www.ciscopress.com/articles/article.asp?p=1888110>
