Choose our FCP_FWF_AD-7.4 learning guide, you won't regret, you can have the right to use the version of our FCP_FWF_AD-7.4 study materials offline.

NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com.All user accounts in the marketing department reside in an organizational unit (OU) named OU1. You have a Group Policy object (GPO) named GPO1. GPO1 contains Folder Redirection settings. GPO1 has default permissions.You discover that the Folder Redirection settings are not applied to the users in the marketing department.You open Group Policy Management as shown in the exhibit. (Click the Exhibit button.)You need to ensure that the Folder Redirection settings in GPO1 apply to the marketing users.What should you do?**A.** Enforce GPO1.**B.** Enable the link of GPO1.**C.** Modify the Delegation settings of GPO1.**D.** Modify the link order of GPO1.**Answer: A**

NEW QUESTION: 2The operating condition that cannot be identified by using a queuing model is the:**A.** Actual amount of time each unit spends in the queue.**B.** Probability of a specified number of units in the queue.**C.** Average percentage of time that a service facility is idle.**D.** Average number of units in the system and the mean length of the queue.**Answer: A**
Explanation:Queuing models determine the operating characteristics of a waiting line: the probability that no units are in the system, the average units in the line, the average units in the system, the average time a unit waits, the average time a unit is in the system, the probability that a unit must wait, and the probability of a given number of units in the system. However, the actual time spent in the queue cannot be determined from the model.

NEW QUESTION: 3You are tasked with moving a legacy application from a virtual machine running inside your datacenter to an Amazon VPC. Unfortunately this app requires access to a number of on-premises services and no one who configured the app still works for your company. Even worse there's no documentation for it. What will allow the application running inside the VPC to reach back and access its internal dependencies without being reconfigured? (Choose 3 answers)**A.** An IP address space that does not conflict with the one on-premises**B.** An Internet Gateway to allow a VPN connection.**C.** An AWS Direct Connect link between the VPC and the network housing the internal services**D.** An Elastic IP address on the VPC instance**E.** A VM Import of the current virtual machine**Answer: A,C,E**
