NEW QUESTION: 1 Refer to the exhibit. Which two actions restrict access to router R1 by SSH? (Choose two.)
A. Remove sequence 10 from access list 100 and add sequence 20 deny tcp any any eq telnet to access list 199.
B. Configure transport output ssh on line vty and remove sequence 10 from access list 199.
C. Remove class-map ANY from service-policy CoPP.
D. Configure transport input ssh on line vty and remove sequence 30 from access list 100.
E. Configure transport output ssh on line vty and remove sequence 20 from access list 100.
Answer: D, E
Explanation: To only allow SSH to R1, we have to: + Deny Telnet in ACL 100 because the action of class-map: PERMIT is "permit" + Permit Telnet in ACL 199 because the action of class-map: ANY is "drop" But: + In ACL 100 there is a permit statement for Telnet traffic "20 permit tcp any any eq telnet (5 matches)" which is not correct so we must remove this statement. + In ACL 199 there is an ACL statement "10 deny tcp any eq telnet any (50 matches)". This statement is aimed for Telnet traffic leaving R1 which is not correct so we must remove this statement. Note: + The command "transport output telnet ssh" allows telnet and SSH from this device (to other devices). + Telnet is TCP port 23. + When using Telnet on source port, it affects Telnet traffic leaving from R1.

NEW QUESTION: 2 A single Visualforce page. All pages must be wrapped inside a single page component tag.
A. apex:insert
B. apex:axis
C. apex:page
D. apex:outputLabel
Answer: C
